

ACQUISITION NEWS

VIRGINIA, USA- Alexandria, January 30, 2023: End to End Enterprise Solutions Inc. (E3S), (formerly End to End Computing), a Virginia-based Advanced Technologies and AI/ML services company, has completed the acquisition of D2K Technologies for an undisclosed amount. This will accelerate End to End Enterprise Solutions' leadership, product offerings and customer base in AI/ML and Autonomous systems, at the same time it will drive greater scale and revenue growth from an expanded total addressable market.

Esteve Mede, CEO of End to End Enterprise Solutions (E3S) said, "This is an important achievement E3S, since the combined company is positioned to capitalize on growth opportunities in the AI/ML markets and the long-term prospects are favorable. Both teams have worked tirelessly to make this happen and our transition is road mapped to prevent service or client disruption."

Carlton Harris, Chief Growth Officer of End to End Enterprise Solutions (E3S) explained the rationale behind the acquisition, "Our purchase of D2K Technologies ticked many boxes for us, since the strength of their services and mastery of AI has been recognized in all the right places. They will boost our capabilities to perform to a high standard, which is always our benchmark for client satisfaction."

This acquisition increases the number of IPs offered to customers from two to six and will provide customers with a one-stop-shop for their Advanced technology needs. This will include expanded Custom Computer Programming capabilities comprising advanced methodologies such as Model Based Engineering, Intelligent Autonomous Systems, Agile Software Development and Big Data Analytics.

Acquisition News Cont'd

D2K's proven AI team enables E3S to offer leading innovation and contribute to the industry thinking on the utilization of digital twin technologies in a meaningful way across industries. This accelerates the strategic objective of scaling revenues by monetizing the subject matter expert status of D2K and E3S' masterminds, IP licensing and custom design and delivery.

About the two companies:

End to End Enterprise Solutions LLC. founded in 2012, almost 11 years ago, by Esteve Mede and Carlton Harris, is a 8(a), Service-Disabled Veteran-Owned, and Disadvantaged Small Business. Under their guidance, with principal Wilfredo (Freddy) Candelaria, it offers advanced technology solutions, cybersecurity, AI/ML services to assist private and public-sector clients to manage and maintain their mission. With a primary base in the Gov-Con space, it has achieved solid success and growth in that segment and is in the final stages of FedRamp certification. E3S also boasts proprietary services such as Singularity™, a SOC solution and NIMBLE™ currently under development with the D2K team.

D2K is a strong leader in the AI and Autonomous Systems market and has been a pioneer behind the development of systems for NASA and the Aerospace industry since being founded in 2014. by Maria Walker and co-managed by Mark Walker. D2K Technologies specialize in Deployment of Integrated Cognitive Computer Systems which are Artificial Intelligence (AI) systems. These systems encompass machine learning, adaptive reasoning, natural language processing, model-based engineering, autonomous system control, digital-twin simulation, big data analytics process management and control, system health prognostics, intuitive human-computer interaction, internet of things and other 21st century technologies.
