

END TO END

ENTERPRISE SOLUTIONS

About Us

End to End End to End Enterprise Solutions provides innovative solutions to today's cybersecurity and crisis management challenges.

- ✓ Minority-owned
- ✓ SBA 8(a) Certified
- ✓ Small disadvantaged business
- ✓ Service-disabled veteran owned

Past Performance

End to End is a successful awardee of several small business government-wide acquisition contracts. The company's past and current customers include:

Federal Emergency Management Agency

United States Access Board

U.S. Department of State

U.S. Department of Education

Transportation Security Administration

US Commission on Civil Rights

SINGULARITY

End to End Enterprise Solutions' proprietary platform for security management.

Singularity is a centralized Security Operations Center (SOC) that provides real-time continuous monitoring for cyber environments and captures vital information needed to quickly respond to incidents while satisfying federal cybersecurity reporting requirements.

Singularity integrates with over 700 technologies to support enterprise monitoring and incident response. This approach unlocks the potential for shared services.

Singularity is expected to be FedRAMP authorized this spring, which means the federal government will have found the cloud based platform-as-a-service to be compliant with federal cybersecurity standards and can be more easily authorized across federal agencies compared to non-FedRAMP products.

Additional Services

End to End also provides services including penetration testing, FISMA (Federal Information Security Management Act) reporting, project management, and more capabilities tailored to fit client and contract requirements.
